Concrete contribution to
a changing world

ERMCO
EUROPEAN READY MIXED CONCRETE ORGANIZATION

MARKET IMPLEMENTATION IN TURKEY

Mrs. Asli Ozboratharhan ⁽¹⁾

⁽¹⁾THBB Secretary General

Abstract

After joining the Concrete Sustainability Council the Turkish Ready-Mixed Concrete Association (THBB) was appointed in May 2017 as the Regional System Operator (RSO) for Turkey.

The CSC Regional System Operator is expected to promote and enhance CSC Certification System. The RSO is the link between the global CSC organization and the local market.

As the Regional System Operator of Turkey, the THBB has established the CSC Turkish Advisory Board and CSC Turkish Technical Committee. The CSC Turkish Advisory Board is composed of the representatives of all relevant stakeholders to enhance the credibility and recognition of this new certification system in Turkey: some members of the THBB Board, representatives of state institutions and organizations and relevant associations such as the Turkish Green Building Council. The CSC Turkish Technical Committee has been set up to prepare the adjustment proposals coherent with the locally applicable technical framework and to provide technical support when it is required.

The THBB has translated the CSC documents such as the Quick Scan and the Technical Manual. News and updates on the CSC and Responsible Sourcing Certification System are periodically shared through the THBB magazine and via social media with all the stakeholders. Training courses and special seminars will be organized soon to ensure the implementation of the Responsible Sourcing

Keywords: Responsible Sourcing, Sustainability, Certification.
